## Mapi Research Trust partners with Wiley to enhance Clinical Outcome Assessment resources for researchers

Mapi Research Trust today announced a new partnership with John Wiley & Sons to manage translations and distribution of electronic Clinical Outcome Assessments (COAs) for use in clinical trials.

Wiley, a global leader in research and education, licenses verified, peer-reviewed content, published in its STM journal portfolio, for use as COAs in clinical trials. Wiley's partnership with Mapi will enable researchers to access high-quality translations, usage guidelines, and scoring rubrics to accompany COA content licensed from Wiley.

Mapi Research Trust is the largest curator of COAs worldwide. They represent over 600 exclusive COAs on behalf of their developers and copyright holders. Mapi Research Trust is focused on ensuring the scientific integrity of COAs through consistent translations and providing appropriate context for researchers to use in clinical trial use.

"High-quality supplemental materials for COAs ensures consistency across versions and translations. Reliable users' manuals are essential to assure the integrity of COAs and the accuracy of the results they gather. Mapi Research Trust is committed to the highest standards in clinical trial resources, and our partnership will ensure that Wiley's COAs are used consistently and appropriately by research teams," said Sonia Bothorel, Mapi Research Trust's Managing Director.

"Our goal is to empower researchers and their process while facilitating rigorous science and research discovery. Partnering with Mapi Research Trust helps Wiley protect the scientific integrity of the content published in our journals by ensuring that researchers have the resources they need to use the content appropriately in clinical trials," said Rebecca Cook, Associate Director of Copyright & Permissions, Wiley.

### About Mapi Research Trust

[Mapi Research Trust](https://eprovide.mapi-trust.org/) is a non-profit organization founded to promote the use of Clinical Outcomes Assessments (COAs) in health research and practice, and encourage exchanges of Patient-Centered Outcomes and COAs information among academics, pharmaceutical companies, health care organizations and health authorities. With the web-based platform [ePROVIDE™](https://eprovide.mapi-trust.org/) that includes the databases [PROQOLID™](https://eprovide.mapi-trust.org/) and [PROLabels™](https://eprovide.mapi-trust.org/), Mapi Research Trust has become the pre-eminent source of reliable, up-to-date and comprehensive information about COAs. Visit <https://eprovide.mapi-trust.org/> and <http://mapi-trust.org> for more information.

### About Wiley

[Wiley](http://www.wiley.com) drives the world forward with research and education. Through publishing, platforms and services, we help students, researchers, universities, and corporations to achieve their goals in an ever-changing world. For more than 200 years, we have delivered consistent performance to all of our stakeholders. The company's website can be accessed at [www.wiley.com](http://www.wiley.com).
